zeeve

Rollups, AppChains and Node Infrastructure

World's Most Secure & Reliable Web3 infrastructure Management Platform

SECURE | SCALABLE | HIGH AVAILABILITY

zeeve

Zeeve is the leading **AppChain Infrastructure as a Service** Platform

Trusted by the World's Leading Organizations

ISO 27001, GDPR and SOCII Type2 Compliant

30,000+ web3 startups & 40+ enterprises using Zeeve

"Zeeve has delivered consistently to help us fulfill our Economy of Things initiative with a powerful and flexible Blockchain Infrastructure as a Service offering. Our teams greatly appreciate their protocol expertise and technical and advisory support."

David Palmer - Visionary & Global Platform Innovator
Vodafone Blockchain

6+ Years of Blockchain Experience

100+ Blockchain, DevOps & Subject Matter Experts

40+ Blockchain Protocols Supported

9 Cloud Providers Supported

40+ Enterprises using Zeeve platform

30,000+ Zeeve BaaS Platform Users

Zeeve web3 Infrastructure Platform

The easiest way to deploy and scale web3 Infrastructure

Automated Deployments and Management

Low-code deployments of web3 Infrastructure with all allied components

Heterogeneous Cloud Deployments

Supports 10+ cloud providers including BYOC

Network Analytics and Real-time Monitoring

Advanced analytics and 24x7 Monitoring with Alerts and Notifications

Robust 3rd Party Integrations Marketplace

40+ 3rd party protocols and tools like AA, DA, Oracles, Interoperability, Wallet, Developer tools, etc.

Migration Support

Migrate to web3 infrastructure with Zeeve experts

Cost savings

>60%

Faster Time to Market

>90%

Uptime guarantee

>99.9%

Zeeve Platform and Products

Rollups as a service

- Launchpad for Rollups
- Support for both OP Stack and zkRollups
- Rich with Explorer, Faucet, Bridges, wallets etc
- Enterprise SLA
- 24x7 monitoring
- Migration Support

Traceye - Data Indexing

- Index and Query Blockchain data 5x faster
- 99.99% availability
- Support for Public Chains and AppChains/ Rollups
- Webhooks, alerts, zero maintenance

TraceHawk - Block Explorer

- Index and Query Blockchain data for all major chains
- 99.99% availability
- Support for both Shared and Dedicated Indexer
- Support for AppChains also

Cero - Decentralized Sequencer

- Decentralized Sequencing on-demand
- Support for multiple rollup stacks
- Native token staking with a hybrid setup
- Low cost and Low Latency sequencing of transactions

AppChain Infrastructure

- Launch custom Blockchain using Cosmos SDK or Substrate
- Rich with Explorer, Faucet, Bridges, wallets etc
- 24x7 monitoring
- Secure and Scalable
- Enterprise SLA

ZEEVE PRODUCT

Rollups as a Service (RaaS)

Configurations & Flexibility
Unlimited flexibility to deploy and manage your Rollup

Enterprise-grade Node Infrastructure
Reliable nodes with load balancing, scalability and high availability

White-labeled Block Explorer
Integrated white-labeled and feature-rich Block Explorer

Cost-optimized Super Performance
Blazingly fast APIs, high throughput and scale-on-demand

Enterprise SLA
24x7 support with 99.9% uptime guarantee

Data Indexing and Data APIs
Real-time access to Data APIs with super-fast indexers

Global Cloud Coverage
Supports 9 cloud providers with 150+ regions across the world

Node Analytics and 24x7 Proactive Monitoring
Advanced analytics and 24x7 Monitoring with Alerts and Notifications

Production-Ready Stack with all components
Faucet, cross-chain bridges, wallet infrastructure, etc

Migration Assistance
Expert support for migration to your own Rollup infrastructure

"Polygon CDK is designed to simplify the launch of ZK-powered custom blockchains. With their RaaS offering, Zeeve is taking this a step further by helping developers of all kinds to build their Polygon CDK-developed chains more rapidly and securely."

Osman Sarman, Polygon Labs Enablement Team

Official RaaS Implementation Partner for:

polygon CDK zkSync

OP STACK ARBITRUM

ZEEVE PRODUCT

Custom Blockchain DevOps and Infrastructure

Configurations & Flexibility
Unlimited flexibility to deploy and manage your Blockchain

Enterprise-grade Node Infrastructure
Reliable nodes with load balancing, scalability, and high availability

White-labeled Block Explorer
Integrated white-labeled and feature-rich Block Explorer

Cost-optimized Super Performance
Blazingly fast APIs, high throughput and scale-on-demand

Enterprise SLA
24x7 support with 99.9% uptime guarantee

Data Indexing and Data APIs
Real-time access to Data APIs with super-fast indexers

Global Cloud Coverage
Supports 9 cloud providers with 150+ regions across the world

Node Analytics and 24x7 Proactive Monitoring
Advanced analytics and 24x7 Monitoring with Alerts and Notifications

Production-Ready Stack with all components
Faucet, cross-chain bridges, wallet infrastructure, etc

Migration Assistance
Expert support for migration to your custom Blockchain infrastructure

"Accessibility and reliability are both fundamental for companies to adopt blockchain solutions, and Zeeve provides uninterrupted access to Coreum, making it as easy with its enterprise-grade infrastructure."

Bob Ras - Co-creator of Coreum | Coreum

Polkadot · COSMOS SDK · HYPERLEDGER FABRIC · HYPERLEDGER BESU

ZEEVE PRODUCT

Avalanche Subnet as a Service

Configurations & Flexibility
Unlimited flexibility to deploy and manage your Subnet

Enterprise-grade Node Infrastructure
Reliable nodes with load balancing, scalability and high availability

White-labeled Block Explorer
Integrated white-labeled and feature-rich Block Explorer

Cost-optimized Super Performance
Blazingly fast APIs, high throughput and scale-on-demand

Enterprise SLA
24x7 support with 99.9% uptime guarantee

Hosted Subgraphs and Data APIs
Real-time access to Data APIs with super-fast indexers

Global Cloud Coverage
Supports 9 cloud providers with 150+ regions across the world

Node Analytics and 24x7 Proactive Monitoring
Advanced analytics and 24x7 Monitoring with Alerts and Notifications

Production-Ready Stack with all components
Faucet, cross-chain bridges, wallet infrastructure, etc

Migration Assistance
Expert support for migration to your own Subnet infrastructure

"Zeeve's infrastructure platform for Avalanche Subnets helped us improve healthcare information security with multi-jurisdictional compliance."

David Stefanich – CEO | Rymedi

AVALANCHE

ZEEVE PRODUCT

Dedicated Node Infrastructure

Support for Managed Nodes for 40+ Public Blockchains
Managed dedicated node infrastructure

Global Cloud Coverage
Supports 9 cloud providers with 150+ regions across the world

Node Analytics and 24x7 Proactive Monitoring
Advance Analytics and 24x7 Monitoring with Alerts and Notifications

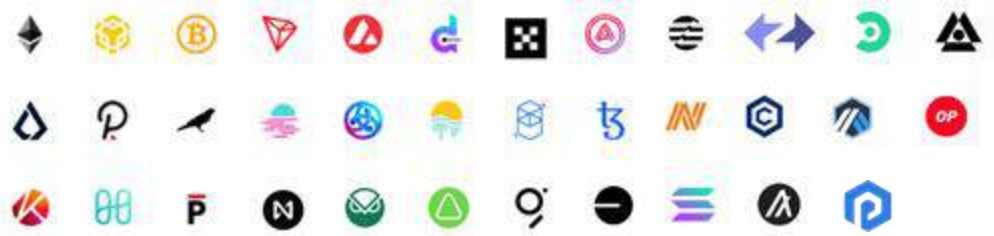
Cost-optimized Super Performance
Blazingly fast APIs, high throughput and scale-on-demand

Enterprise SLA
24x7 monitoring and support with 99.9% uptime guarantee

"We are immensely excited to collaborate with Zeeve, who has proven instrumental in facilitating MELD's vision of seamless and efficient Node operation."

Ken Olling - Co-Founder | MELD

40+ Blockchain Protocols supported.....and counting



Cost savings	Nodes managed	Uptime guarantee
>60%	>6000	>99.9%

ZEEVE PRODUCT

Traceye - Shared Data Indexing and Hosted Subgraphs

Shared Data Indexing for all Major Public chains
Enterprise-grade shared data indexing infrastructure for all major public chains

Dedicated Indexing Infrastructure
Support for both shared and dedicated indexers

Zero Maintenance
Get the most advance data indexing stack - dedicated and fully managed

Super Performance and Smart APIs
Blazingly fast indexing, zero latency and smart APIs

Enterprise SLA
24x7 monitoring alerts and support with 99.9% uptime guarantee

"Zeeve's Data Indexing and hosted subgraphs enabled us to focus on our user experience without worrying about scaling to millions of users for our Portfolio dapp."

Pratik Arora - Product Head, Kunji.finance

All major Public Chains Supported:

Subgraphs
Unlimited

Queries
Unlimited

Data Entities
Unlimited

ZEEVE PRODUCT

Traceye - Dedicated Data Indexing and Graph Node Infrastructure

Managed Subgraphs
Enterprise-grade data indexing infrastructure to launch, and manage subgraphs and query Blockchain data

Dedicated Data Indexing Infrastructure Management
Fully managed dedicated data indexing infrastructure

Developer Friendly
Suite of features like webhooks, direct DB access, etc for developers

Super Performance and Smart APIs
Blazingly fast indexing, zero latency and smart APIs

Enterprise SLA
24x7 monitoring alerts and support with 99.9% uptime guarantee

"Zeeve's Data Indexing and hosted subgraphs enabled us to focus on our user experience without worrying about scaling to millions of users for our Portfolio dapp."

Pratik Arora - Product Head, Kunji.finance

All Custom AppChains and Rollups Supported:

polygon · zkSync · OP STACK · ARBITRUM · Polkadot · COSMOS SDK · HYPERLEDGER BESU · AVALANCHE · substrate_

Subgraphs	Queries	Data Entities
Unlimited	Unlimited	Unlimited

ZEEVE PRODUCT

TraceHawk - Block Explorer

Superior UX
Get the best of UX, yet feature-rich to uncover all data layers

Enterprise-grade Infrastructure
Blazingly fast data queries and block syncing with enterprise SLA

Customizable UI
Branding options to match the theme of your brand and network

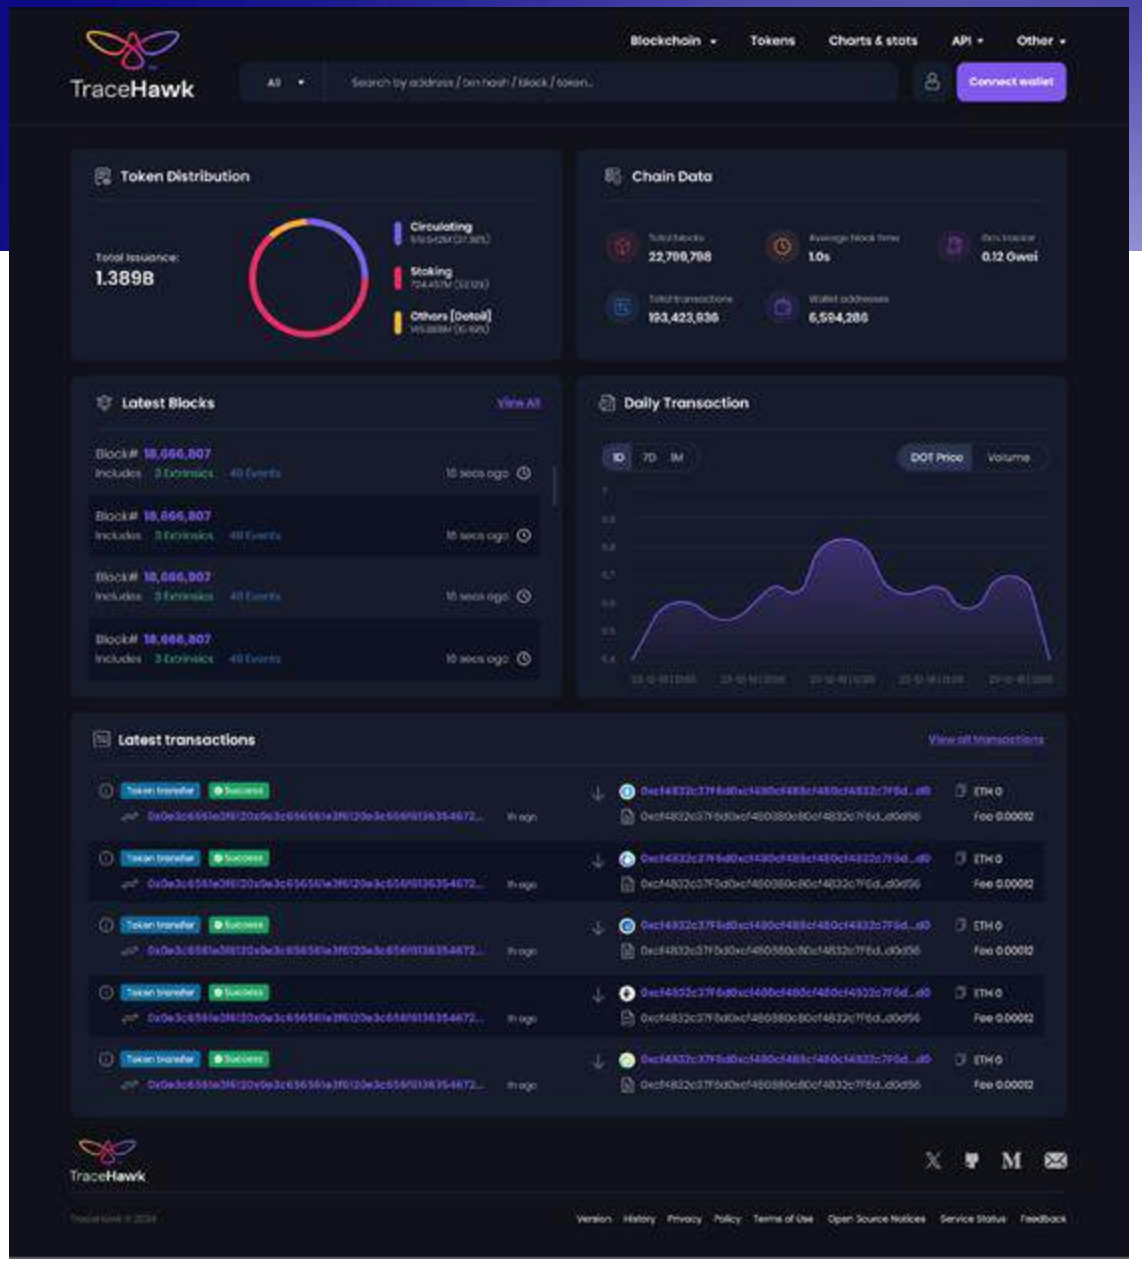
Comprehensive Token Support
Supports ERC20, ERC721, ERC677 & ERC1155 token standards

API-Driven End Points
Get secure and optimized APIs to fetch on-chain activities

Dedicated 24x7 Support
24x7 monitoring and support by our Blockchain experts

Support all AppChain and Rollup Stacks

polygon zkSync OP STACK ARBITRUM COSMOS SDK



ZEEVE PRODUCT

Zeeve – Integration Partners

Account Abstraction

Alchemy, Biconomy, Halliday, Particle Network, Pimlico, Web3Auth

Block Explorers

Blockscout, Chainlens, Dora, OKX Explorer

Case Study | DAB: Digital Asset Broker Consortium

vodafone

- Category – Telecom Consortium
- Blockchain Protocol – Corda 4.7 and Cordite
- Cloud – AWS to start upon
- Network Size – 60 Nodes to scale to 500+

INDUSTRY: TELECOM

Challenges

Required an enterprise-grade R3 Corda network with

- On-demand scaling
- 24x7 Monitoring
- Automation of CI/CD
- Legacy integration

With Zeeve

Results

- Seamless Onboarding
- Cost Saving of ~60%
- Faster time to market by ~80%
- 24x7 Proactive Monitoring
- 24x7 Support and Enterprise SLA

"Zeeve has delivered consistently to help us fulfill our Economy of Things initiative with a powerful and flexible Blockchain Infrastructure as a Service offering. Our teams greatly appreciate their protocol expertise and technical and advisory support."

David Palmer - Visionary & Global Platform Innovator | Vodafone Blockchain

Case Study | Polygon CDK Rollup for Pentagon Games

- Category – Web3 Gaming
- Blockchain Protocol – Polygon CDK Rollup
- Cloud – Multicloud
- Network Size – 6 Nodes to scale to 50+

INDUSTRY: WEB3 GAMING

Challenges

Required a Layer2 zkRollup with

- Highly Configurable
- Gasless Transactions
- High Scalability
- Fully Managed Rollup

With Zeeve

Results

- zkRollup with Polygon CDK stack
- Rollup testNet in 2 days
- Account Abstraction support
- RaaS Dashboard
- Enterprise SLA

"The team at Pentagon Games is thrilled to have reached this stage in our development, collaborating with Zeeve to build critical infrastructure that will power the next generation of experiences in Web3 gaming." Said Idon Liu, Co-founder of Pentagon Games."

Idon Liu, Co-founder | Pentagon Games

Case Study | Avalanche Subnet

SIEMENS energy

INDUSTRY: ENERGY AND UTILITIES

- Category – Energy and Utilities
- Blockchain Protocol – Avalanche Subnet
- Cloud – Multicloud
- Network Size – 12 Nodes to scale to 50+

Challenges

Required an enterprise-grade Energy Consortium network with

- High Availability Custom Network
- 24x7 Monitoring and Support
- Consortium Members Onboarding
- Data Compliances

With Zeeve

Results

- Subnet with custom configs and HA
- Cost Saving of ~50%
- Faster time to market by ~90%
- Management Dashboard
- Enterprise SLA

"Zeeve has done a phenomenal job with Subnets by its Blockchain as a Managed Service, so you will see many more subnets launch that were wanted to launch or waited to launch because they needed a player like Zeeve to abstract their infrastructure."

John Nahas - Chief Business Officer | Ava Labs

Case Study | Optimistic Rollup for Binary Holdings

- Category – Telecom
- Blockchain Protocol – OP Stack L2 Rollup
- Cloud – Multicloud
- Network Size – 10 Nodes to scale to 50+

BINARY
THE HOLDINGS

INDUSTRY: TELECOM

Challenges

Required an enterprise-grade L2 Rollup using OP Stack with

- Custom Configs and High Availability
- Native Gas Token support
- Custom Block Explorer and Bridges
- Validium with data compliances

With Zeeve

Results

- Superchain compatible Rollup launch
- Cost Saving of ~40%
- Faster time to market by ~90%
- RaaS Dashboard
- Enterprise SLA with 24x7 Monitoring

"Our partnership with Zeeve marks a pivotal moment in our mission to revolutionize Web3 accessibility in telecom, By integrating Optimistic Rollup technology, we're primed to deliver scalable, cost-efficient services crucial for Web3 growth. With Zeeve's robust tools and support, our L2 Chain deployment ensures seamless operations, compliance, and security, fostering telecom innovation, all while propelling BNRY's utility to new heights."

Manit Parikh, CEO | The Binary Holdings

Case Study | Managed Network Infrastructure

energy web

- Category – Energy and Utilities
- Blockchain Protocols – EVM , Substrate
- Cloud – Multicloud
- Network Size – 40 Nodes to scale to 100+

INDUSTRY: ENERGY & UTILITIES

Challenges

Required an enterprise-grade EVM and Substrate networks with

- High-performing and scalable nodes
- Automated Deployments
- Data Compliances
- 24x7 Monitoring and Support

With Zeeve

Results

- L1 Network - High Performing with HA
- Cost Saving of ~45%
- Faster time to market by ~90%
- Monitoring Dashboard with Alerts
- Enterprise SLA

"The collaboration between Energy Web and Zeeve aims to mark a milestone in the evolution of web3 infrastructure for our enterprise member community, allowing companies to focus on their business while helping maintain the network."

Jesse Morris - CEO | Energy Web

Case Study | Cosmos chain for Router Protocol

router

- Category – Interoperability
- Blockchain Protocol – Cosmos SDK
- Cloud – Multicloud
- Network Size – 30 Nodes to scale to 500+

INDUSTRY: DeFi and Interoperability

Challenges

Required an enterprise-grade Cosmos SDK-based L1 network

- Super performing network with HA
- On-demand scaling
- Automation of adding new protocols
- 24x7 monitoring and support

With Zeeve

Results

- Heterogenous deployment architecture
- Cost Saving of ~40%
- Faster time to market by ~90%
- Management Dashboard
- Enterprise SLA with 24x7 support

"Partnering with Zeeve has been transformative for our Interoperability Protocol. Their powerful and adaptable Blockchain Infrastructure as a Service has been perfect for our needs. Zeeve's deep protocol knowledge and unwavering support have helped us overcome challenges and drive our project forward. They are a crucial part of our innovation journey."

Ramani Ramachandran, CEO | Router Protocol
