developed web and mobile systems
over last 1 years

what we **do**

blockchain

integrations

web development

support & maintenance

product design

mobile development

We offer custom software development for organizations of all shapes and sizes – from emerging startups, mid-sized companies and consultancy agencies, to renowned NGOs and international organizations.

blockchain **experts**

Blockchain is an area we're especially proud of being experts in – not only because it's a groundbreaking technology, but also because of its global, humanitarian impact. We're honored to have been entrusted with a major Blockchain for social impact project – a global food assistance program that helps wire cash to some of the most impoverished communities in the world.

tech stack we use

b.

blockchain:

substrate

mobile:

Swift

Kotlin

Flutter

React Native

**cloud
services:**

Java

Kotlin

Scala

MySQL

PostgreSQL

**we create a long-term
partnership and help our
clients build reliable and
scalable software solutions**

industries we specialise

in fintech

We have significant experience developing traditional and blockchain-based transactions systems. We are responsible for the creation and maintenance of one of the biggest private Ethereum systems for humanitarian needs.

health & fitness

We developed several applications that serve to increase general fitness of its users and help with the well-being. Most of the apps required collection of data coming from various kinds of Bluetooth sensors.

public safety

We have long-running experience in developing systems for emergency operators and mobile applications that allow users to securely share their location with emergency centers.

logistics

We build several traditional and blockchain-based supply chain management solutions that are applied in various industries. Our solutions facilitate handling and tracking of goods and offers shareholders an easy insight into product journey from the manufacturing plant to a shelf in the supermarket.

our business partners are

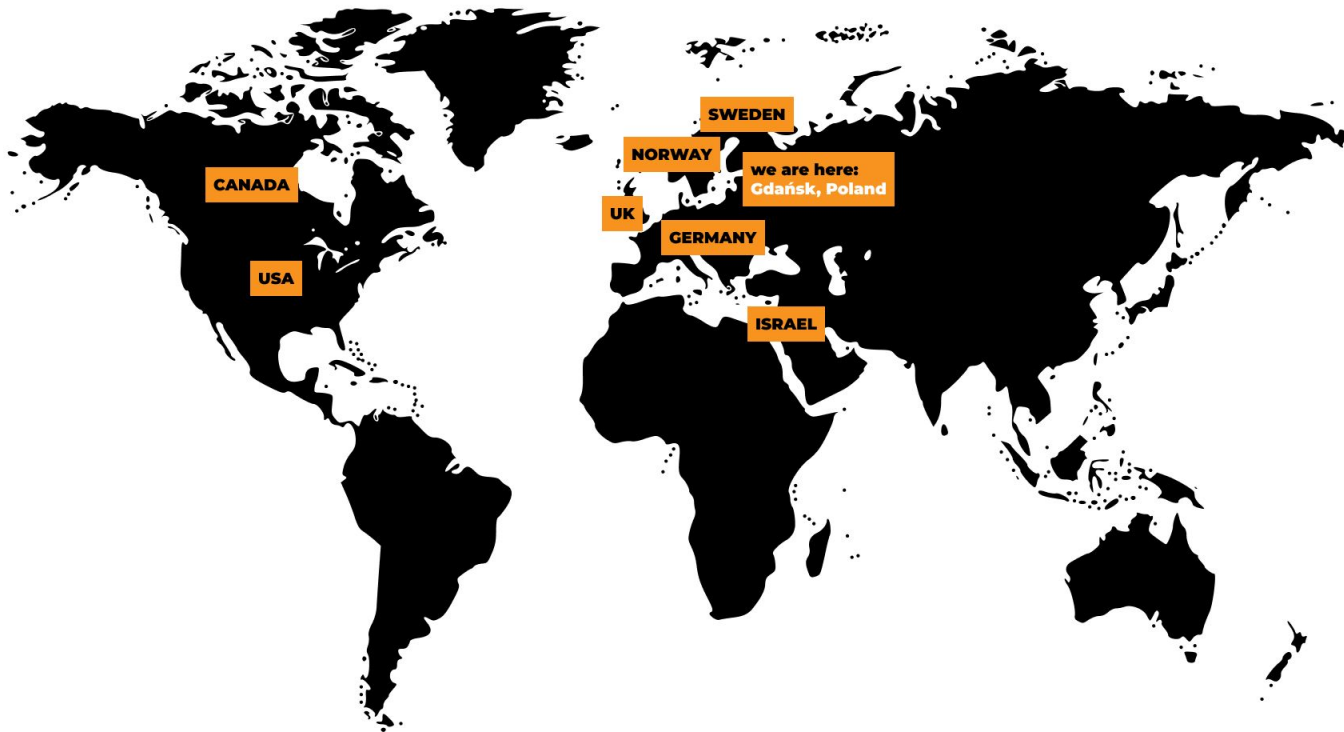

enterprises
manufacturing
companies
SMB businesses
startups
NGOs

finebite

markets we work with

why **us**

responsibility

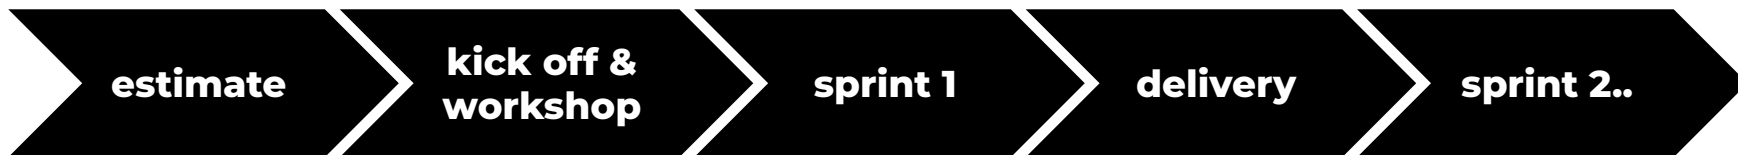

flexibility

teamwork

positive attitude

client orientation

We believe that successful products come out of bright minds. The success of projects we do is completely sustained by our team and values we are committed to. We work together making the most of experience and knowledge we have.

GOALS

Getting to know the basic project scope

Creating first rough time and cost estimate for the project

ACTIONS

Open Discussion
High level analysis

GOALS

Getting to know the development team and the client side

Collection of ideas and approaches for the next phases

Creating plan for the next sprints

Creating detailed estimate for the following sprint

ACTIONS

Interactive workshop

GOALS

Implementation of the sprint scope

Validation of implemented solutions

Introduction of mechanisms to collect measurable data (metrics) from the system

ACTIONS

Development
Testing
Continuous integration

GOALS

Hand over results of the sprint

Prepare scope for the next sprint

Feedback collection

ACTIONS

Presentation of the working solution
Formal approval of delivery
Next sprint planning

Iterate until the product is ready for release

Collect feedback from users, analyze metrics and iterate further

A man and a woman are working at a desk in an office. The man, on the left, is wearing glasses and a dark jacket, and is looking at a computer monitor while holding a phone to his ear. The woman, on the right, is wearing a patterned blouse and is typing on a laptop. The desk is cluttered with various items, including a white mug, a smartphone, and some papers. The background is a plain, light-colored wall.

**we are eager to try new
innovative solutions to make
your product unique**

what our **partners** say

Dorian Koch

Co-Founder & Former CEO / MedKitDoc

Compared to everyone else, bright inventions doesn't promise things they can't deliver. [...]. The best thing about them is that I can count on their actions.

Adam Pachucki

Head of Product / Finebite

Their attention to detail and scrutiny when dealing with technical challenges is noteworthy.

Kira Nezu

Project Manager / AppAdvisors GmbH

Working with Bright Inventions is always a pleasure. The people involved are friendly and to the point. They're also pragmatic, constructive, and punctual.

Matthias Potthast

Founder / Relevo

Bright inventions and the whole team is always with full heart at the project, understands our logic and intention behind and respects our requests and demands.
